Note: HD boxes will also comply with non-HD specifications (e.g. a Type 1 HD box will meet the requirements of a Type 1 box).

Method of Documentation of Acceptance:

By brand and source. Box and lid combinations should be used only in the pairs as shown in the QPL. The pull box shall be permanently labeled with "AHTD", "ELECTRIC", the manufacturer's name and model identifier. The permanent label "AHTD" and "ELECTRIC" shall be placed on the outside of the pull box lid. In addition, the pull boxes should be checked for workmanship and condition.

Method of Approval:

- The manufacturer will supply a sample, box and lid, to the Materials Division for testing and evaluation. The pull box shall be permanently labeled with "AHTD", "ELECTRIC", the manufacturer's name and model identifier. The permanent label

Concrete Pull Boxes

“AHTD” and “ELECTRIC” shall be placed on the outside of the pull box lid.

- The manufacturer will supply information concerning the composition of the product and any restrictions to the handling or use of the product. For jobs let under the 2014 Standard Specifications for Highway Construction section 711.02 "Materials" specifies the material composition. For jobs under the 2003 Standard Specifications for Highway Construction Supplemental Specification 711-1 (Rev. 8-20-09) specifies the material composition
- Approval based upon laboratory testing may be withdrawn if field performance is unacceptable.

The following will also apply for products containing iron or steel:

All iron and steel material used on Department projects must be in compliance with the "Buy America" requirements and the Department's "Standard Specifications for Highway Construction", Subsection 106.01. This means all manufacturing processes of iron and steel in a product (i.e., smelting/remelting and any subsequent process which alters the steel material's physical form or shape or changes its chemical composition) must occur within the United States to be considered of domestic origin. This includes processes such as rolling, extruding, machining, bending, grinding, drilling and applying coatings. The use of pig iron or processed, pelletized and reduced iron ore manufactured outside of the United States is permitted in the domestic manufacturing process for steel and/or iron materials. All steel and iron mill test reports must include a certified statement that all manufacturing processes for the iron or steel product occurred in the United States. Each supplier/fabricator of an intermediate product will also certify that the product complies with the "Buy America" requirements.

No information contained in these lists is to be used for promotional purposes.

The manufacturer of privately labeled products must be disclosed.
